Interpersonal Speaking: Conversation 1

**Note:** Student responses are quoted verbatim and may contain grammatical errors. In the transcripts of students’ speech quoted in the commentaries, a three-dot ellipsis indicates that the sample has been excerpted. Two dots indicate that the student paused while speaking.

**Overview**

This question assessed speaking ability in the interpersonal mode of communication by having students respond to a series of questions in a simulated conversation. The task comprised a statement identifying an interlocutor and conversation topic followed by six questions. Students were allotted 20 seconds to speak at each turn in the conversation. Students should demonstrate the ability to interact appropriately, given the specified cultural context, in an unrehearsed, spontaneous fashion, and the responses should reflect the integration of a variety of critical thinking skills — such as analyzing, synthesizing, comparing, and evaluating — in the process of meaning negotiation.
