Definitions of Common Voice-Leading Errors (DCVLE) 
(Use for Questions 5 and 6)

1. Parallel fifths and octaves (immediately consecutive) — unacceptable (award 0 points)

2. Beat-to-beat fifths and octaves (equal perfect intervals on successive beats) — unacceptable (award 0 points)

3. Fifths and octaves by contrary motion — unacceptable (award 0 points)

4. Unequal fifths (d5→P5)
   - In a three- or four-part texture, a rising d5→P5 is acceptable ONLY in the progressions I–V3/4→I6 and I–vii°6→I6 (no deduction).
   - A rising d5→P5 in other progressions is unacceptable (1-point error).
   - The reverse, a rising P5→d5, is acceptable voice leading (no deduction).
   - Unequal fifths between two upper voices are acceptable in either order when the voices are descending (no deduction).

5. Hidden (or covered) fifths and octaves in outer voices (similar motion to a perfect interval that involves one voice moving by step)
   - When the step is in the upper voice, as shown in Ex. 5a — acceptable (no deduction).
   - When the step is in the lower voice, as shown in Ex. 5b — unacceptable (1 point error).

6. Direct fifths and octaves in outer voices — unacceptable (1-point error)
   Definition: Similar motion to a perfect interval that involves a skip in each voice. N.B.: Many sources equate “hidden” and “direct.” For purposes of scoring, it seems useful to refine those definitions, particularly in light of past scoring practice.

7. Overlapping voices — unacceptable (1-point error)
   Definition: Two voices move to a position in which the lower voice is higher than the previous note in the higher voice, or they move to a position where the higher voice is lower than the previous note in the lower voice.

8. Crossed voices — unacceptable (1-point error)
   Definition: Voicing in which the normal relative position of voices is violated, e.g., if the soprano is below the alto or the bass is above the tenor.
Question 5

SCORING: 25 points

I. Roman Numerals (7 points, 1 point per numeral)
   Award 1 point for each correct Roman numeral.
   1. Accept the correct Roman numeral regardless of its case.
   2. Ignore any Arabic numerals, because they are included in the question itself.
   3. Award no credit if an accidental is placed before a Roman numeral.

II. Chord Spelling, Spacing, and Doubling (6 points, 1 point per chord)
   A. Award 1 point for each chord that correctly realizes the given figured bass.
      1. The chord must be spelled correctly.
      2. The fifth (but not the third) may be omitted from any root-position triad.
      3. The fifth (but not the third or seventh) may be omitted from a root-position dominant seventh chord.
      4. All inverted triads and inverted seventh chords must be complete.
      5. All triads must contain at least three voices.
      6. All seventh chords must contain at least four voices.
   B. Award 0 points for a chord that breaks one or more of the conditions of II.A.
      N.B.: Award 0 points for voice leading into and out of these chords. (See III.E.)
   C. Award ½ point each for a correctly realized chord that has exactly one of the following errors:
      1. A doubled leading tone, a doubled chordal seventh, or incorrect doubling of a 6° chord.
      2. More than one octave between adjacent upper parts.
   D. Award 0 points for a correctly realized chord that has
      1. More than one error listed in II.C., or
      2. The accidental on the wrong side of the chord.
      However, do check the voice leading into and out of these chords.
III. Voice Leading (12 points)

A. In general, award 2 points for acceptable voice leading between two correctly realized chords. N.B.: This includes the voice leading from the given chord to the second chord.

B. If all chords are correctly realized and there are no voice-leading errors (as described in II.B. and II. C.), but the response seems to have excessive leaps within the upper three voices:
   1. Award 12 points for voice leading if there are six or fewer leaps in the three upper voices combined.
   2. Award 11 points for voice leading if there are more than six leaps in the three upper voices combined.

C. Award only 1 point for voice leading between two correctly realized chords (as defined in II.A.) that features exactly one of the following errors:
   1. Uncharacteristic rising unequal fifths. (See DCVLE, no. 4.)
   2. Uncharacteristic hidden (covered) or direct octaves or fifths between outer voices. (See DCVLE, nos. 5 and 6.)
   3. Overlapping voices. (See DCVLE, no. 7.)
   4. Motion leading to a chord with crossed voices. (See DCVLE, no. 8.)
   5. A chordal seventh approached by a descending leap.

D. Award 0 points for voice leading between two correctly realized chords (as defined in II.A.) if any one of the following statements is true:
   1. Parallel octaves, fifths, or unisons occur (immediately successive or on successive beats), including those by contrary motion. (See DCVLE, nos. 1 through 3.)
   2. Uncharacteristic leaps occur (e.g., augmented second, tritone, or more than a fifth).
   3. Chordal sevenths are unresolved or resolved incorrectly. (The voice with the seventh must move down by step if possible. In some cases, such as a suspension, the seventh must be retained in the same voice and then resolved.)
   4. The leading tone in an outer voice is unresolved or resolved incorrectly.
   5. The 6th or 4th of a 6/4 chord is unresolved or resolved incorrectly.
   6. No preparation or incorrect preparation of the suspension, or incorrect resolution of the suspension. (This includes the incorrect doubling of the note of resolution.)
   7. At least one of the chords has more or fewer than four voices (soprano, alto, tenor, and bass).
   8. More than one error listed in section III.C. occurs.

E. Award 0 points for voice leading into and out of an incorrectly realized chord.

IV. Scores with Additional Meaning

0 1 This score can be given to a response that has redeeming qualities.
0 0 This score is used for a response that represents an unsuccessful attempt to answer the question (has no redeeming qualities, or only one) or a response that is off topic or irrelevant.
   — The dash is reserved for blank responses.

V. Notes

A. Do not penalize a response that includes correctly used nonchord tones.
B. An incorrectly used nonchord tone is considered a voice-leading error.
   Award 1 point if the incorrect nonchord tone results in one error listed in III.C.
   Award 0 points if the incorrect nonchord tone results in at least one error from III.D. or more than one error from III.C.
C. Half-point totals round up with one exception: A total score of 24½ rounds down to 24.
Question 5. (Suggested time—15 minutes)

Realize the figured bass below in four voices, following traditional eighteenth-century voice-leading procedures. Continue logically from the spacing of the first chord. Do not add embellishments unless indicated by the figured bass. In the space below each chord, supply the Roman numeral that appropriately indicates harmonic function.
Question 5. (Suggested time—15 minutes)

Realize the figured bass below in four voices, following traditional eighteenth-century voice-leading procedures. Continue logically from the spacing of the first chord. Do not add embellishments unless indicated by the figured bass. In the space below each chord, supply the Roman numeral that appropriately indicates harmonic function.

```
g:  I   IV₆   V₇   Ⅲ₆   Ⅰ   Ⅴ₇   Ⅰ
    1   3   5   3   1   5   3
    1   5   3   7   3   1   1
```
Question 5. (Suggested time—15 minutes)

Realize the figured bass below in four voices, following traditional eighteenth-century voice-leading procedures. Continue logically from the spacing of the first chord. Do not add embellishments unless indicated by the figured bass. In the space below each chord, supply the Roman numeral that appropriately indicates harmonic function.
Overview

The intent of this question was to test students’ ability to:

- realize a figured bass progression in Common Practice style;
- demonstrate an understanding of diatonic harmony, including chord spelling in a four-part texture, voice leading, and doubling;
- analyze chords using Roman numerals;
- remember to raise the leading tone in the minor mode; and
- notate an authentic cadence with a 4–3 suspension.

Sample: 5A
Score: 23

This represents an excellent response. All Roman numerals are correct, and all chords are spelled correctly. The voice-leading connections between chords one through six are good and received full credit (2 points each). One point was awarded for chord spelling for the last chord, but the voice leading received no points because of the dissonance created by the suspended C in the soprano and the B-flat in the tenor. (Chord spelling: 6; Voice leading: 10; Roman numerals: 7; Total = 23).

Sample: 5B
Score: 16

This represents a good response. All Roman numerals are correct. Chords two, five, and seven are spelled correctly and were awarded 3 points for chord spelling. Because of spacing errors (more than an octave between alto and tenor) in chords three and four, ½ point was awarded for chord spelling for each. The chordal seventh is omitted in chord six, so no points were awarded. Because of the uncharacteristic leap in the tenor between chords two and three, no voice-leading points were awarded for that connection. The voice-leading connection between chords four and five was awarded 1 point because of the overlap between the soprano and alto. Because there are misspelled chords, no points were awarded for voice leading between chords five and six, and between chords six and seven. (Chord spelling: 4; Voice leading: 5; Roman numerals: 7; Total = 16)

Sample: 5C
Score: 6

This represents a weak response. Four Roman numerals are correctly labeled. Chords three and seven are spelled correctly, but because the leading tone is doubled in chord three, ½ point was awarded for that chord. Because no two contiguous chords are spelled correctly, no voice-leading points were awarded. (Chord spelling: 1½; Voice leading: 0; Roman numerals: 4; Total = 5½, rounded up to 6)
