About the College Board

The College Board is a mission-driven not-for-profit organization that connects students to college success and opportunity. Founded in 1900, the College Board was created to expand access to higher education. Today, the membership association is made up of more than 5,900 of the world's leading educational institutions and is dedicated to promoting excellence and equity in education. Each year, the College Board helps more than seven million students prepare for a successful transition to college through programs and services in college readiness and college success — including the SAT[®] and the Advanced Placement Program[®]. The organization also serves the education community through research and advocacy on behalf of students, educators, and schools.

SECTION II

Total time—2 hours

Question 1

(Suggested time—40 minutes. This question counts for one-third of the total essay section score.)

The United States Postal Service (USPS) has delivered communications for more than two centuries. During the nineteenth century, the USPS helped to expand the boundaries of the United States by providing efficient and reliable communication across the country. Between 1790 and 1860 alone, the number of post offices in the United States grew from 75 to over 28,000. With this growth came job opportunities for postal workers and a boom in the cross-country rail system. The twentieth century brought substantial growth to the USPS, including large package delivery and airmail. Over the past decade, however, total mail volume has decreased considerably as competition from electronic mail and various package delivery companies has taken business away from the USPS. The loss of revenue has prompted the USPS to consider cutting back on delivery days and other services.

Carefully read the following seven sources, including the introductory information for each source. Then synthesize information from at least three of the sources and incorporate it into a coherent, well-developed essay that argues a clear position on whether the USPS should be restructured to meet the needs of a changing world, and if so, how.

Make sure your argument is central; use the sources to illustrate and support your reasoning. Avoid merely summarizing the sources. Indicate clearly which sources you are drawing from, whether through direct quotation, paraphrase, or summary. You may cite the sources as Source A, Source B, etc., or by using the descriptions in parentheses.

Stone, Daniel. "Flying Like an Eagle?" *Newsweek*.
Newsweek, 5 Oct. 2009. Web. 24 Sept. 2010.

The following is excerpted from an online article in a national news magazine.

Anyone who's waited, and waited, in line at the old letter hub knows the service could probably be run better. NEWSWEEK asked a variety of management consultants and business futurists how to turn the old pony express into a sleek, 21st-century moneymaker—or, at the very least, a breaker-even. Listen up, Postal Service (and Congress): for this advice, we'll let you cut in line.

1) Get into the e-business. More people are e-mailing? So meet their needs. "Give every American an e-mail address when they're born," suggests futurist Watts Wacker. Might they look elsewhere for a different one? Sure, but at least you'll maintain relevance in their mind. Plus, you can sell lucrative advertising on those accounts.

2) Increase service. Don't drop from six- to five-day delivery; go the other way, says Kellogg School marketing prof Richard Honack—to all seven. It seems counterintuitive to add service when you're losing money, but people have less faith in the system precisely because of spotty service. Consider tightening hours, but the USPS could be the first carrier to reliably deliver all week.

3) Advertise with coupons. It sounds like an archaic way to attract customers in a new era, but if people are flocking to the Internet, give them an incentive to come back. "We're a coupon-cutting society," says futurist and business strategist Marlene Brown. "Make people feel like there's value added."

4) Make a play for control of government broadband [Internet access]. With Congress considering an expansion of broadband access, why not put it under the USPS, asks futurist David Houle. "That would define the Postal Service as a communications-delivery service, rather than just a team of letter carriers. Don't let the service's tie to Congress make it fizzle. If used right, why not use it as an advantage?"

5) Rebrand. No one knows what the Postal Service stands for, says Wacker. "Fly like an eagle, what does that even mean?" A company's brand is its most valuable tool, or its biggest liability. Contract out to find a new logo and slogan that actually convey what you do and how you do it. And then use them. (In this week's NEWSWEEK magazine, we asked three design firms to get started.)

6) Close branches if you must, but do it strategically. Franchise services by region, posits business strategist Gurumurthy Kalyanaram. You don't need a full-service post office every few blocks in New York, for example. Some centers could be for letters only, others for packages. That way you cut down on staff size and service required to and from each.

7) Reorganize and motivate staff. Paying high wages with inflated job security isn't a competitive strategy. Unions may be fierce, but consultant Peter Cohan thinks management should put employee contracts out to bid. And add incentives: if a worker saves money, give him a percentage. Inversely, put jobs on the line to avoid losses. In other words, run it like a real business.

O’Keefe, Ed. “Postal Service Expected to Announce ‘Significant Changes.’” *Washington Post*. Washington Post Company, 2 Mar. 2010. Web. 27 Sept. 2010.

The following is excerpted from an online article in a national newspaper.

The U.S. Postal Service will release projections Tuesday that confirm for the first time the suspicion that mail volume will never return to pre-recession levels. In response, the agency is pushing anew for a dramatic reshaping of how Americans get and send their letters and packages.

Customers are continuing to migrate to the Internet and to cheaper standard-mail options, and away from the Postal Service’s signature product—first-class mail, Postmaster General John E. Potter will report in announcing the projections.

The Postal Service experienced a 13 percent drop in mail volume last fiscal year, more than double any previous decline, and lost \$3.8 billion. The projections anticipate steeper drops in mail volume and revenue over the next 10 years, and mounting labor costs only complicate the agency’s path to firm fiscal footing.

In an effort to offset some of the losses, Potter seeks more flexibility in the coming year to set delivery schedules, prices and labor costs. The changes could mean an end to Saturday deliveries, longer delivery times for letters and packages, higher postage-stamp prices that exceed the rate of inflation, and the potential for future layoffs.

“At the end of the day, I’m convinced that if we make the changes that are necessary, we can continue to provide universal service for Americans for decades to come,” Potter said Monday. “We can turn back from the red to the black, but there are some significant changes we need to make.”

The postmaster general called for many of these changes last year but failed to convince lawmakers. This time he’s armed with \$4.8 million worth of outside studies that conclude that, without drastic changes, the mail agency will face even more staggering losses.

McDevitt, Caitlin. "To Postal Workers, No Mail Is 'Junk': With Revenues Falling, the Post Office Owes Its Future to Stuff We Throw Out." *Newsweek*. Newsweek, 27 Sept. 2008. Web. 28 Sept. 2010.

The following is excerpted from an online article in a national news magazine.

These are tough times for the U.S. Postal Service. It's being pummeled by high fuel costs. The soft economy is crimping the overall volume of mail, which fell 5.5 percent in the past year. Its business is also falling as Americans opt for e-mail over birthday cards and thank-you notes. Now comes another threat: consumers like Colleen Plimpton of Bethel, Conn. Earlier this year Plimpton became tired of the credit-card offers, catalogs and advertising fliers that clogged her mailbox. So in February she paid \$20 to GreenDimes, a firm that helps consumers reduce their inflow of "junk mail" by contacting businesses on their behalf. "[Junk mailers] are cutting down trees willy-nilly, and that has got to stop," says Plimpton.

To the post office, consumers like her are a serious threat. "Efforts to convince people not to receive mail are really going to hurt," says Steve Kearney, a Postal Service senior vice president.

The Postal Service lost \$1.1 billion in its latest quarter. That number would be even larger if it weren't for direct mailings, which now constitute 52 percent of mail volume, up from 38 percent in 1990. Revenue from direct mail "is the financial underpinning of the Postal Service—it could not survive without it," says Michael Coughlin, former deputy postmaster.

But 89 percent of consumers say in polls that they'd prefer not to receive direct-marketing mail; 44 percent of it is never opened. That's why 19 state legislatures have debated Do Not Mail lists, which would function just like the federal Do Not Call list. But partly due to opposition from postal workers, not a single bill has passed. When Colorado state Rep. Sara Gagliardi held a public meeting on a bill she was sponsoring, she was surprised when a crowd of postal workers showed up to express vehement opposition.

Both the Postal Service and the Direct Marketing Association say direct mail is a key source of customers for small businesses. "Advertising mail is a very valuable product to many consumers," says Sam Pulcrano, Postal Service vice president for sustainability, who points to two-for-one pizza coupons as especially welcome surprises. To blunt opposition, the DMA recently launched the Mail Moves America coalition to lobby against the restrictions.

GreenDimes founder Pankaj Shah isn't sympathetic. Not only is his company providing a service to consumers, he says, but it has also used its fees to plant more than 1 million trees. "We're all about giving consumers choice, not about bringing down the post office," he says. Still, as more consumers opt out of junk mail, rain, sleet and gloom of night may seem like the least of mail carriers' problems.

Cullen, Kevin. "Sending, Getting 'Real' Mail Still Magic." *Commercial-News*. Commercial-News, 20 Mar. 2010. Web. 28 Sept. 2010.

The following is excerpted from an online article.

E-mail is fast and simple, but to me an old-fashioned, handwritten letter has value in this speed-obsessed world. I have deleted hundreds of e-mails in one fell swoop, without taking the time to reread them, but I still have a letter that my Grandpa Cullen sent to me when I was 8.

I like to receive letters, thank-you notes, birthday cards and Christmas cards, and I like to send them too. Even today, it costs just 44 cents to send one from Danville to Sandybeach, Hawaii, or Frozentoos, Alaska . . . a genuine bargain.

Historians worry about the disappearance of permanent, written records. If there were no "real" letters, diaries, governmental files, handbills, pamphlets, magazines, newspapers and books—real ink on real paper—what would be left? Will electronic records even survive for 100 years? And what will happen if they don't? . . .

The Postal Service has been required to pay its own costs since 1970, and it made a profit until 2006. Since then, declining mail volume has created major problems. It delivered 17 percent fewer pieces in 2009 than it did in 2006, and lost \$1.4 billion. That money was borrowed from the U.S. Treasury.

More declines in volume, coupled with the soaring cost of retiree health benefits, could create \$238 billion in losses over the next 10 years, Postmaster General John Potter recently said. Approximately half of the present 300,000 postal workers are expected to retire by 2020.

Eliminating Saturday mail delivery would save \$40 billion over a decade. Potter also wants to close and consolidate 154 post offices. More and more part-time workers would be hired as full-time workers retire.

Clearly, mail delivery isn't going away entirely. It's an essential government function, like feeding the Army. No private contractor will carry a letter from the Florida Keys to Alaska for 44 cents.

I'm going to do my bit by sending more letters.

Our Christmas card list will be expanded. Birthday cards will go to more friends and family. And I'm going to thank more people, in writing, for more things. I will send more cards and letters to offer encouragement, interest and sympathy. It shows good breeding.

I have shoeboxes filled with kind letters sent to me through the years by readers who liked something that I wrote. I always thanked them by return mail. Many friendships began that way. Those messages weren't deleted 100 at a time; they were saved, and they can be reread. . . .

It's satisfying to write a "real" letter, put it in an envelope and drop it into the mailbox. A day or two later, I know, someone will hold it and connect with me. Who knows? It may be read by someone I will never meet, 100 years from now.

Not a bad investment, for 44 cents.

Question 2

(Suggested time—40 minutes. This question counts for one-third of the total essay section score.)

On April 10, 1962, as the United States was emerging from a recession, the nation’s largest steel companies raised steel prices by 3.5 percent. President John F. Kennedy, who had repeatedly called for stable prices and wages as part of a program of national sacrifice during a period of economic distress, held a news conference on April 11, 1962, which he opened with the following commentary regarding the hike in steel prices. Read Kennedy’s remarks carefully. Then write an essay in which you analyze the rhetorical strategies President Kennedy uses to achieve his purpose. Support your analysis with specific references to the text.

Line
5 Simultaneous and identical actions of United States Steel and other leading steel corporations, increasing steel prices by some 6 dollars a ton, constitute a wholly unjustifiable and irresponsible defiance of the public interest.

10 In this serious hour in our nation’s history, when we are confronted with grave crises in Berlin and Southeast Asia, when we are devoting our energies to economic recovery and stability, when we are asking Reservists to leave their homes and families for months on end, and servicemen to risk their lives—and four were killed in the last two days in Viet Nam—and asking union members to hold down their wage requests, at a time when restraint and sacrifice are being asked of every citizen, the American people will find it hard, as I do, to accept a situation in which a tiny handful of steel executives whose pursuit of private power and profit exceeds their sense of public responsibility can show such utter contempt for the interests of 185 million Americans.

20 If this rise in the cost of steel is imitated by the rest of the industry, instead of rescinded, it would increase the cost of homes, autos, appliances, and most other items for every American family. It would increase the cost of machinery and tools to every American businessman and farmer. It would seriously handicap our efforts to prevent an inflationary spiral from eating up the pensions of our older citizens, and our new gains in purchasing power.

30 It would add, Secretary McNamara* informed me this morning, an estimated one billion dollars to the cost of our defenses, at a time when every dollar is needed for national security and other purposes. It would make it more difficult for American goods to compete in foreign markets, more difficult to withstand competition from foreign imports, and thus more difficult to improve our balance of payments position, and stem the flow of gold.

40

45 And it is necessary to stem it for our national security, if we are going to pay for our security commitments abroad. And it would surely handicap our efforts to induce other industries and unions to adopt responsible price and wage policies.

50 The facts of the matter are that there is no justification for an increase in the steel prices. The recent settlement between the industry and the union, which does not even take place until July 1st, was widely acknowledged to be non-inflationary, and the whole purpose and effect of this Administration’s role, which both parties understood, was to achieve an agreement which would make unnecessary any increase in prices.

55 Steel output per man is rising so fast that labor costs per ton of steel can actually be expected to decline in the next twelve months. And in fact, the Acting Commissioner of the Bureau of Labor Statistics informed me this morning that, and I quote: “Employment costs per unit of steel output in 1961 were essentially the same as they were in 1958.”

60 The cost of the major raw materials, steel scrap and coal, has also been declining, and for an industry which has been generally operating at less than two-thirds of capacity, its profit rate has been normal and can be expected to rise sharply this year in view of the reduction in idle capacity. Their lot has been easier than that of a hundred thousand steel workers thrown out of work in the last three years. The industry’s cash dividends have exceeded 600 million dollars in each of the last five years, and earnings in the first quarter of this year were estimated in the February 28th Wall Street Journal to be among the highest in history.

70 In short, at a time when they could be exploring how more efficiency and better prices could be obtained, reducing prices in this industry in recognition of lower costs, their unusually good labor contract, their foreign competition and their increase in production and profits which are coming

80

2012 AP[®] ENGLISH LANGUAGE AND COMPOSITION FREE-RESPONSE QUESTIONS

this year, a few gigantic corporations have decided to increase prices in ruthless disregard of their public responsibilities.

85 The Steel Workers Union can be proud that it abided by its responsibilities in this agreement, and this government also has responsibilities, which we intend to meet.

90 The Department of Justice and the Federal Trade Commission are examining the significance of this action in a free, competitive economy.

95 The Department of Defense and other agencies are reviewing its impact on their policies of procurement, and I am informed that steps are underway by those Members of the Congress who plan appropriate inquiries into how these price

decisions are so quickly made, and reached, and what legislative safeguards may be needed to protect the public interest.

100 Price and wage decisions in this country, except for very limited restrictions in the case of monopolies and national emergency strikes, are and ought to be freely and privately made, but the American people have a right to expect in return for that freedom, a higher sense of business responsibility for the welfare of their country than has been shown in the last two days.

110 Some time ago I asked each American to consider what he would do for his country and I asked the steel companies. In the last 24 hours we had their answer.

* Robert S. McNamara, secretary of defense from 1961 to 1968

Question 3

(Suggested time—40 minutes. This question counts for one-third of the total essay section score.)

Consider the distinct perspectives expressed in the following statements.

If you develop the absolute sense of certainty that powerful beliefs provide, then you can get yourself to accomplish virtually anything, including those things that other people are certain are impossible.

William Lyon Phelps, American educator, journalist, and professor (1865–1943)

I think we ought always to entertain our opinions with some measure of doubt. I shouldn't wish people dogmatically to believe any philosophy, not even mine.

Bertrand Russell, British author, mathematician, and philosopher (1872–1970)

In a well-organized essay, take a position on the relationship between certainty and doubt. Support your argument with appropriate evidence and examples.
