AP Biology: Transitioning to Inquiry-Based Labs

Gain an understanding of inquiry, inquiry models and levels, and their place in the classroom.

Introduction to AP Biology

Learn about the changes to the redesigned AP Biology course and concrete strategies for designing and implementing an effective curriculum.

Prepare. Reinforce. Be Confident.

The course units and activities are aligned with the AP Biology redesign. Take one or more courses and build confidence in:

- Getting ready for the AP Course Audit
- Creating classroom strategies to adopt inquiry-based labs
- Teaching science practices
- Preparing for the new exam
- Connecting learning objectives to the new curriculum framework

Synchronized slide and video lessons

Downloadable resources

Easy-to-browse course outline

Built-in tools for notes and reflection

AP Developed

Aligned with the course and exam redesign. Supplements resources on AP Central®.

AP Teacher Approved

Hear what other AP teachers had to say.

“Because the College Board is giving these courses, I personally feel more confident because I know that the exam and this course are aligned together.”

– Susan S., AP Biology Teacher

“Knowing the course is available online increases my confidence because I don’t have to remember everything that we went through. I can go back anytime and recall bits of information to use in my classroom.”

– Gretchen C., AP Biology Teacher
