About the College Board
The College Board is a mission-driven not-for-profit organization that connects students to college success and opportunity. Founded in 1900, the College Board was created to expand access to higher education. Today, the membership association is made up of more than 5,900 of the world's leading educational institutions and is dedicated to promoting excellence and equity in education. Each year, the College Board helps more than seven million students prepare for a successful transition to college through programs and services in college readiness and college success — including the SAT® and the Advanced Placement Program®. The organization also serves the education community through research and advocacy on behalf of students, educators and schools.
For further information, visit www.collegeboard.org.

AP Equity and Access Policy
The College Board strongly encourages educators to make equitable access a guiding principle for their AP programs by giving all willing and academically prepared students the opportunity to participate in AP. We encourage the elimination of barriers that restrict access to AP for students from ethnic, racial and socioeconomic groups that have been traditionally underserved. Schools should make every effort to ensure their AP classes reflect the diversity of their student population. The College Board also believes that all students should have access to academically challenging course work before they enroll in AP classes, which can prepare them for AP success. It is only through a commitment to equitable preparation and access that true equity and excellence can be achieved.

Welcome to the AP® World History Course Planning and Pacing Guides
This guide is one of four Course Planning and Pacing Guides (CPPG) designed for AP® World History (APWH) teachers. Each provides an exemplar of how to plan instruction for the AP course based on the author's academic year schedule, school location and type, and textbook choice. Each CPPG is authored by a current AP World History teacher familiar with the AP World History Curriculum Framework. Each guide provides valuable suggestions regarding all aspects of teaching the course, including the selection of readings, the pace of instruction, instructional activities, and types of assessment. The authors have offered their suggestions — displayed in boxes that appear on the right side of the page — to aid in course planning for AP World History teachers. These tips are intended to provide insight into the why and how behind the author's instructional choices.
Each CPPG also highlights how the different components of the AP World History Curriculum Framework — the key concepts, course themes, and historical thinking skills — are taught over the course of the year. The CPPGs are designed to demonstrate how to successfully teach the AP World History Curriculum Framework by making the skills central to instruction and avoiding spending too much time on “content coverage.” Additionally, each author explicitly explains how he or she manages course breadth and increases depth for each unit of instruction.
The primary purpose of these comprehensive guides is to model approaches for planning and pacing curriculum throughout the school year. However, they can also help with syllabus development when used in conjunction with the resources created to support the AP Course Audit: the Syllabus Development Guide and the four Annotated Syllabi. These resources include samples of evidence and illustrate a variety of strategies for meeting curricular requirements.

### Instructional Setting

**Springbrook High School**  
**Silver Spring, Maryland**

<table>
<thead>
<tr>
<th>School</th>
<th>Public high school with 1,800 students</th>
</tr>
</thead>
</table>
| Student population | Community is suburban and ethnically diverse. Students are:  
- 48 percent African American  
- 16 percent Asian American  
- 14 percent European heritage  
- 22 percent native Spanish speakers  
- 43 percent receive free or reduced-priced lunches.  
- 88 percent are going on to college.  
- 70 percent take one or more AP® classes before graduation.  
- 30 percent take AP World History. |
| Instructional time | There are 180 instructional days; class meets for 47 minutes every day.  
School begins the last week of August. |
| Student preparation | AP World History is offered junior year.  
About half of the students have successfully completed AP U.S. Government and Politics, and the rest took the required National, State, and Local Government class. From eighth through ninth grades, students completed two years of American history. |
Additional primary sources and handouts are posted online within the Web service provided by the school system. |
Overview of the Course

AP World History helps my students better understand how the world we live in got to be the way it is. We examine the evolution of global processes and contacts, including interactions over time, in order to find patterns in the causes and consequences of significant changes in various regions around the world. Moreover, we compare those patterns of changes among major societies since 8000 B.C.E. By the end of the course, I find that students are interested in current events in many more places on the planet and can make connections between those events and the patterns of changes and continuities they discovered in the past.

I use the Key Concepts to organize the lessons and assessments within each unit. The outline of each unit links each Key Concept with formative and summative assessments. The formative and summative assessments cover the range of skill levels I want the students to achieve. I use these assessments to collect evidence of the content and skills the students are mastering. Because my students do not usually master the content and skills evenly at the beginning of the course, throughout the year I encourage them to rewrite their essays and other written assignments after receiving my feedback and an initial grade. In addition, I allow them to correct their multiple-choice quizzes by explaining why the wrong answers they chose are incorrect responses to the stem or question. Moreover, I frequently meet with students individually to help them acquire the skills they need to become more independent learners, emphasizing the effective use of the textbook and other secondary sources as guides to the most important ideas and interpretations in world history. Although many juniors enter AP World History with solid skills in reading, writing, and studying, it is the first challenging history course for a substantial number of them. Therefore, I try to balance improving the skills of all of the students while challenging them with content and appropriate pacing. I find the data from formative assessments very useful for determining which students are demonstrating historical thinking skills and which need more scaffolding from me or academic support from our literacy specialist, peer tutoring services, or school counselors. In order to address my students’ range of learning styles, I use a variety of instructional methods, including lecture-discussion, daily analysis of primary sources, simulations, debates, seminars, and small-group work on annotated maps and timelines.

By making world history an exercise in addressing questions the students themselves have about the past, they remain engaged in seeking evidence to answer those questions. This active participation helps them identify relevant historical evidence as well as recognize the limitations in those sources. As world history is a relatively new field of historical investigation, the frequent historiographical debates that emerge in the field become ideal ways of revealing more about how history is written and rewritten. Students seem to enjoy learning that historians like to challenge each other publicly about their arguments.
## Managing Breadth and Increasing Depth

<table>
<thead>
<tr>
<th>Unit</th>
<th>Managing Breadth</th>
<th>Increasing Depth</th>
</tr>
</thead>
<tbody>
<tr>
<td>Period 1</td>
<td>Instead of teaching each early civilization independently and then comparing and contrasting them, I concentrate on the intersection of course themes and skills. For example, I focus on the relationship between food supply and agriculture; patterns of change and continuity in social stratification; economic specialization of labor; and more complex political units. Instead of systematically covering all civilizations, I use key examples from each while using a themes-and-skills-based approach, thereby reducing the breadth of this section of the course.</td>
<td>In separating what was formerly one period into two distinct periods, I now have the opportunity to spend more time in the first unit focusing on “Big History,” basic world geography, and the environmental theme (which is often neglected). I also use this unit as an opportunity to introduce and lay the foundation for all of the historical thinking skills. For example, I assign a comparative essay on the early civilizations to assess students’ skills in argumentation, use of evidence, contextualization, and comparison, and then work with small groups or individual students to help them get to a basic mastery of those skills.</td>
</tr>
<tr>
<td>Period 2</td>
<td>I wait until Unit 4 to teach about developments in the Americas, thus allowing more time for developments in Afro-Eurasia. I limit the discussion of the major belief systems to basic beliefs because all of these belief systems reappear in later units, when students are more ready to ask questions related to changes that occur in belief systems as they spread.</td>
<td>When covering the rise of imperial societies in the Roman and Han empires, I emphasize practice in analyzing textual and visual primary sources. The sources from Roman and Han historians lend themselves more obviously to comparisons, especially as they relate to currencys and monumental architecture. Students also get more time to analyze the role of belief systems in the Roman, Han, and Gupta empires through textual and visual primary sources.</td>
</tr>
<tr>
<td>Period 3</td>
<td>In this time period, I pay less attention to the details regarding the administration of political systems and more time showing students that the bureaucratic structures developed by the empires in the Mediterranean, South Asia, and East Asia remained the basis for most of the political systems.</td>
<td>Beginning with this unit, I emphasize interactions, especially those having to do with trade. By doing this, students can see more clearly how innovations in technology and the spread of belief systems support the expansion of trade, especially in light of the creation of Islamic states that helped to expand trade networks.</td>
</tr>
<tr>
<td>Period 4</td>
<td>Most students have some background on the “explorers,” so I quickly remind them what they already know rather than repeat the details of each one. I also do not have to spend much time showing them the results of the Columbian Exchange, especially as it related to the spread of crops and animals. Since the effects of the transfer of plants and animals continue today, students usually just need some quick reminders to remember that coffee was domesticated in East Africa, not the Americas, and that potatoes came from South America, not Ireland.</td>
<td>Because early globalization is not intuitive to most students (many assume that all goods traveled everywhere instantly once global travel became more common), I show students how the global economy was first built on the transfer of silver to China. They also need lots of practice with analyzing quantitative data. Giving them repeated opportunities to see how demographic changes are often related to improvements in agriculture or to the spread of disease tends to be of strong interest to the students.</td>
</tr>
</tbody>
</table>
Managing Breadth and Increasing Depth  

<table>
<thead>
<tr>
<th>Unit</th>
<th>Managing Breadth</th>
<th>Increasing Depth</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Period 5</strong></td>
<td>My students have already had two years of American history, so I use what they know to help them compare the causes and the immediate effects of the American Revolution to the other Atlantic revolutions and independence movements. The fact that my students have also received some introduction to Enlightenment ideas in their yearlong government course also helps speed up analysis of the philosophical underpinnings of the Atlantic revolutions.</td>
<td>Since a majority of my students are of African heritage, and many have relatives in the Caribbean, I spend some extra time guiding them through the complicated timeline and effects of the Haitian Revolution. Their natural interest in technology and consumerism leads me to extend the time we spend on the immediate and long-term effects of industrialization throughout the world. This extra time also helps students analyze the causes of the Great Depression in the 20th century in terms of business cycles in the 19th century.</td>
</tr>
<tr>
<td><strong>Period 6</strong></td>
<td>Since our time for this unit is often cut short by snow days, I try to pick case studies of the major developments that seem to be of greatest interest to the students. While my goal is to achieve global balance, I often select more case studies in Africa and Asia than in Latin America because the causes and effects of these cases tend to be easier for students to understand.</td>
<td>Because a majority of my students are male teenagers, we continue to focus on the developments in consumerism, especially as they relate to sports and technology. Continuing to focus on topics most likely to interest them, we discuss the global process of the development of professional sports teams and associations around the world. It is not hard to show how those leisure activities were affected by the global context of the world wars, imperialism, decolonization, the Cold War, and technological innovations, especially toward the end of the 20th century and into the beginning of the 21st century.</td>
</tr>
</tbody>
</table>
Recognize the relationship of geography and climate to human migration, settlement, and interaction, and to list some causes and effects of that relationship.

**KC 1.1. Big Geography and the Peopling of the Earth**

**Theme 1:** Interaction Between Humans and the Environment

**Skills:** Causation, Periodization

**Materials:**
- Bulliet, *The Earth and Its Peoples: A Global History*, Chapter 1, with special attention to section on the Indus Valley civilization
- Manning, *Migration in World History*, Chapters 1–3

**Instructional Activities and Assessments**

<table>
<thead>
<tr>
<th>Instructional Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>List environmental reasons for migration, such as climate change.</td>
</tr>
</tbody>
</table>

**Instructional Activity:**
Discuss the types of archaeological, DNA, and linguistic evidence historians use to trace human migrations.

**Formative Assessment:**
Have students identify on a map the continent names, oceans, and other major bodies of water, and then direct them to add lines showing the migration routes of humans from East Africa, including expansion into Eurasia, the Americas, and Oceania.

**Instructional Activity:**
Recognize archaeological and linguistic evidence historians use to date and trace these migrations.

**Essential Questions:**
- What is “civilization”? © The College Board.  
- Who is “civilized”? © The College Board.  
- How does the definition of “civilized” depend upon unique cultural factors that developed in different regions?
**Unit 1: Period 1. Technological and Environmental Transformations to c. 600 B.C.E. (continued)**

| Connect environmental and climatic effects on modes of economic organization, such as foraging, fishing, agricultural, and pastoral economies. | **KC 1.2.** The Neolithic Revolution and Early Agricultural Societies  
**Theme 4:** Creation, Expansion, and Interaction of Economic Systems  
**Skills:** Comparison, Contextualization, Interpretation | Diamond, Guns, Germs, and Steel, Chapters 1 and 5 and video clip “Yali’s Question” | Instructional Activity:  
For homework, compare Jared Diamond’s argument about the five main factors contributing to the rise of food production with the factors listed in the textbook.  
Instructional Activity:  
Critique Diamond’s argument about the environmental factors that favored interactions in Afro-Eurasia. Discuss his summary of the reasons for other historical interpretations of the “Rise of the West” (Chapter 1, “Yali’s Question”).  
Expand on a discussion of the contemporary economic disparities identified in the video clip “Yali’s Question” to define and compare the economic and political hierarchies apparent in early settled agricultural systems, foraging, fishing, and pastoral economies. |
| Identify the environmental effects of the transition to agriculture on the environment around villages and urban centers in river-valley and nonriver-valley societies. | **KC 1.3.** The Development and Interaction of Early Agricultural, Pastoral, and Urban Societies  
**Theme 1:** Environment  
**Skills:** Contextualization, Use of Evidence | Bulliet, Chapter 2 | Formative Assessment:  
Identify on a map:  
- locations of early settled agricultural, fishing, and pastoral communities  
- domestication of particular crops and animals in specific regions, as well as the persistence of foraging and fishing  
- technology used for agricultural production, trade, and transportation, e.g., chariots and horseback riding in specific regions  
Instructional Activity:  
Identify the environmental effects of the transition to agriculture on the environment around villages and urban centers in river-valley and nonriver-valley societies (e.g., Fertile Crescent, Nile River, Indus River Valley, Huang He Valley, Central American Highlands, Oceania, or Niger-Congo Rivers) by creating a timeline showing the domestication of key plants and animals during this Neolithic Revolution. |

**Essential Questions:** ▼ What is “civilization”? ▼ Who is “civilized”? ▼ How does the definition of “civilized” depend upon unique cultural factors that developed in different regions?

# Learning Objectives

Link the increasing complexity of political and religious structures with the development and transformation of social and gender structures in early agricultural, pastoral, and urban societies.

<table>
<thead>
<tr>
<th>Key Concepts, Themes, and Historical Thinking Skills</th>
<th>Materials</th>
<th>Instructional Activities and Assessments</th>
</tr>
</thead>
<tbody>
<tr>
<td>KC 1.3 Theme 1: Environment Skills: Contextualization, CCOT</td>
<td>Bulliet, Chapter 3</td>
<td><strong>Formative Assessment:</strong> Locate the following early civilizations on a map: Tigris and Euphrates River Valleys, Nile River Valley, Indus River Valley, the Huang He Valley, Mesoamerica (Olmecs), and Andean South America (Chavin). Using quantitative data annotate the map to show the increase in population density in this period.</td>
</tr>
</tbody>
</table>
| KC 1.3 Theme 2: Development and Interaction of Cultures | Andrea, The Human Record: Sources of Global History, Mesopotamian The Epic of Gilgamesh; “Hammurabi’s Code”; Egyptian Book of the Dead (The Negative Confession); Chinese “The Mandate of Heaven”; Indian The Rig Veda, Hebrew “Deuteronomy” | **Formative Assessment:** Use evidence in primary sources in reader to:  
  - compare specialization of labor, including artisans and the development of elites such as rulers, priests, warriors, and bureaucrats in early civilizations  
  - recognize the continuation of patriarchal social systems in both agricultural and pastoral societies  
  - recognize the increasing complexity of political and religious structures (finish for homework) |
| KC 1.3 Theme 2: Cultures Skills: CCOT, Use of Evidence | | **Instructional Activity:** Analyze images of writing systems, monumental architecture, and art from textbook and reader to link them with cultural and religious traditions in the early civilizations, especially those with cities and urban planning. |
| KC 1.3 All themes Skills: CCOT, Use of Evidence | | **Instructional Activity:** Trace on a map increased webs of trade in the Eastern Hemisphere, especially between expanding states with cities where a storable surplus of food supported specialization of labor, accumulation of wealth, and exchange of goods, ideas, and technology. Then write a thesis statement about the effects of those interactions. Focus on trade between Egypt and Nubia and between Mesopotamia and the Indus Valley. |

## Essential Questions

- What is “civilization”?  
- Who is “civilized”?  
- How does the definition of “civilized” depend upon unique cultural factors that developed in different regions?
### Unit 1: Period 1. Technological and Environmental Transformations to c. 600 B.C.E.

#### Estimated Time: 2 weeks

<table>
<thead>
<tr>
<th>Learning Objectives</th>
<th>Key Concepts, Themes, and Historical Thinking Skills</th>
<th>Materials</th>
<th>Instructional Activities and Assessments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Compare the emergence of the first states within the core civilizations</td>
<td>KC 1.3</td>
<td></td>
<td><strong>Formative Assessment:</strong> Write a thesis statement comparing the early civilizations in terms of their cities, political systems, economic and trading systems, systems of social inequality, effects of migrations, and interactions with nomadic peoples. <strong>Summative Assessment:</strong> Students write an essay comparing characteristics of early civilizations.</td>
</tr>
<tr>
<td>All the learning objectives for this unit</td>
<td>KC 1.1, 1.2, 1.3</td>
<td></td>
<td><strong>Summative Assessment:</strong> 20 multiple-choice questions</td>
</tr>
</tbody>
</table>

**Essential Questions:** ▼ What is “civilization”? ▼ Who is “civilized”? ▼ How does the definition of “civilized” depend upon unique cultural factors that developed in different regions?

I share models of different kinds of thesis statements appropriate for the question they will address on the summative assessment. I teach students that all thesis statements must (a) address all parts of the question, (b) take a position, and (c) include some kind of categorization for answering the question usually using the key words in the question and/or the five themes of AP World History. I collect these thesis statements and give students written feedback on their performance; I also give them unlimited chances to master this skill throughout the year.

This essay requires students to address the unit’s Essential Questions. The essay also requires students to analyze the historical interpretations behind the comparisons between different early civilizations.

To make my unit tests, I use a combination of multiple-choice questions from the AP World History Course and Exam Description, released exams, practice exams, as well as ones I create. I also create a grid that helps me include questions that touch on all of the geographic regions, themes, and relevant key concepts and historical thinking skills. Students then use the grid the day after the test to assess their own performance and adjust their study strategies for the next assessment.
## Period 2: Organization and Reorganization of Human Societies, c. 600 B.C.E. to c. 600 C.E.

**Estimated Time:** 4 weeks

|                     | **Skills:** Comparison, Use of Evidence      | Wiesner-Hanks, *Discovering the Global Past: A Look at the Evidence*, Chapter 4: “Han and Rome: Asserting Imperial Authority” |
|                     |                                               | **Instructional Activity:**
|                     |                                               | Using assigned pages in the textbook and relevant primary sources, complete charts and analytical thesis statements that compare the development of the techniques of imperial administration, including bureaucracies, laws, diplomacy, militaries and technological support for them, trade (including the creation of currencies), and integration with or suppression of religious hierarchies in China, Persia, Rome, and South Asia. (Start in class and finish as homework.) |
| **KC 2.2**          | **Theme 5: Social Structures**                | Bulliet, Chapters 4–6 | **Instructional Activity:**
|                     | **Theme 3: State-Building**                  | Adams, *Experiencing World History*. Sections on continuities and changes in gender structures and demography from 8000 B.C.E. to 600 C.E. |
|                     | **Skills:** Comparison, Use of Evidence      | **Instructional Activity:**
|                     |                                               | Using assigned pages in the textbook and relevant primary sources, complete charts and analytical thesis statements that compare the social and economic dimensions of imperial societies, including the role of cities (Persepolis, Chang’an, Pataliputra, Athens, Rome, Alexandria, and Constantinople), social hierarchies, labor specialization and methods of controlling labor (slavery, rents and tribute, and household production), and patriarchy. (Start in class and finish as homework.) |

**Summative Assessment:**
Discuss the continuities and changes over time in demography and gender structures based on readings in Experiencing World History. The changes and continuities in demography and gender systems in this time period are dependent on the belief systems, social hierarchies, and political systems.

**Formative Assessment:**
Place the emergence of the early civilizations and key states and empires in Afro-Eurasia in chronological order.

**Identify the correct order of the emergence of early civilizations and key states and empires in Afro-Eurasia.**

**All Key Concepts in Units 1 and 2**

**Essential Questions:**
- How did belief systems reinforce and/or alleviate social hierarchies?
- Why did rulers of states have to legitimize their power?

---

I give timeline quizzes every few weeks as formative assessments. I then let the students either take a makeup quiz or explain why they thought an event was earlier or later. This process of reflecting on their acquisition of new knowledge by figuring out their own misunderstandings tends to unpack their faulty logic. It also gives me an opportunity to reteach a chronological concept.
### Learning Objectives

<table>
<thead>
<tr>
<th>Key Concepts, Themes, and Historical Thinking Skills</th>
<th>Materials</th>
<th>Instructional Activities and Assessments</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Compare the processes that supported the formation of classical empires and the factors that led to their decline.</strong></td>
<td>KC 2.2</td>
<td>Instructional Activity: The essay analyzes the factors that led to imperial decline in this time period, including a breakdown in social hierarchies and political legitimacies. This assessment directly relates to the unit’s Essential Questions.</td>
</tr>
</tbody>
</table>

**KC 2.2**
- All themes

**Skills:** Causation, CCOT, Comparison, Contextualization, Synthesis, Use of Evidence

**Instructional Activity:**
- Debate the most significant cause of the decline, collapse, and transformation of empires as related to internal and external problems and tensions. Students use evidence about soil erosion, silted rivers, and deforestation as the basis for internal problems and tensions between Han China and the Xiongnu, Gupta and the White Huns, and the Romans and their northern and eastern neighbors as the basis for external problems faced by these empires. (Start during class and finish as homework.)

**Summative Assessment:**
- Students write an essay comparing the process of decline for two classical empires.

**Explain the causes and effects of the transregional networks of communication and exchange.**

**KC 2.3.** Emergence of Transregional Networks of Communication and Exchange

**Theme 4: Economic Systems**
- Causation, CCOT, Comparison, Contextualization, Synthesis, Use of Evidence

**Formative Assessment:**
- Create an annotated topographical map of Afro-Eurasia that locates the routes, goods, and technologies (camel and horse saddles, stirrups, and lateen sails for dhows) used along the following transregional communication and exchange networks: Eurasian silk roads, Trans-Saharan caravan routes, Mediterranean Sea lanes, Indian Ocean sea lanes, North-South Eurasian trade routes.

**Essential Questions:**
- ▼ How did belief systems reinforce and/or alleviate social hierarchies?
- ▼ Why did rulers of states have to legitimize their power?
## Unit 2: Organization and Reorganization of Human Societies, c. 600 B.C.E. to c. 600 C.E. (continued)

### Learning Objectives

#### Key Concepts, Themes, and Historical Thinking Skills

| Explain the causes and effects of the transregional networks of communication and exchange. | KC 2.3  
Theme 4: Economic Systems  
Skills: Causation, CCOT, Contextualization, Synthesis, Use of Evidence | Bulliet, Chapters 4–6 | Formative Assessment:  
Use assigned pages in the textbook and lecture notes to add annotations to the trade networks map described above to explain the technological (new crops and qanat system), biological (disease epidemics), and cultural (changes in Christianity, Hinduism, and Buddhism) consequences of long-distance trade.  
Instructional Activity:  
Simulate the effects of the linked trade systems in Afro-Eurasia by keeping two merchants in entrepôts and sending two others to selected entrepôts located throughout the Indian Ocean, Silk Road, and Trans-Saharan trade networks.  
Formative Assessment:  
Locate and compare characteristics of trade networks on a graphic organizer or in a simulation. |
| All learning objectives for Unit 1 and 2 | All Key Concepts in Periods 1 and 2  
All themes  
Skills: all | | Summative Assessment:  
Unit Test: 50 multiple-choice questions for Units 1 and 2, which include questions that touch on all of the geographic regions, themes, relevant Key Concepts (KC 1.1, 1.2, and 1.3; KC 2.1, 2.2, and 2.3), and historical thinking skills. |

### Essential Questions:

- How did belief systems reinforce and/or alleviate social hierarchies?
- Why did rulers of states have to legitimize their power?
Period 3. Regional and Transregional Interactions, c. 600 to c. 1450

Estimated Time: 7 weeks

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>Explain the continuities and changes in the expansion and intensification of communication and exchange networks.</td>
<td>KC 3.1. Expansion and Intensification of Communication and Exchange Networks</td>
<td>Selections from Reilly, <em>Worlds of History, A Comparative Reader</em>, Volume 1, Chapter 10</td>
<td>Instructional Activity: Analyze textual, visual, and quantitative sources about the causes of the spread of Islam in the Arabian peninsula and the effects of the spread of Islam in North Africa and the Iberian peninsula. Formative Assessment: Create an annotated timeline of the rise of Islamic empires and states along with the other major political systems in Afro-Eurasia during this period, and then periodize the timeline to show important breaks and changes over the postclassical period. Justify these choices in verbal or written form.</td>
</tr>
<tr>
<td>Demonstrate knowledge of historiographical and periodization issues.</td>
<td>All Key Concepts in Units 2 and 3</td>
<td>Instructional Activity: Using the timelines in the textbook and a few excerpts from relevant articles, compare use of the terms “classical,” “medieval,” and “postclassical” for the transition from Unit 2 to Unit 3. Formative Assessment: Discuss the usefulness of 600 C.E. to 1450 for the postclassical period in analyzing historical effects in the Americas; debate the usefulness of 600 C.E. for areas of Afro-Eurasia not affected by the spread of Islam.</td>
<td></td>
</tr>
</tbody>
</table>

**Essential Questions:**

- What is the value in studying cultural areas vs. states?
- Did changes in this period occur more from the effects of nomadic migrations or urban growth?
- To what extent did economic networks overlap during this period?
## Learning Objectives

### Key Concepts, Themes, and Historical Thinking Skills

### Materials

### Instructional Activities and Assessments

**Formative Assessment:**
Write a thesis statement comparing the annotated map created for the end of the classical period with the two postclassical annotated trade maps to identify the changes and continuities over time in transportation technologies, state support for commercial growth, and commercial practices for the luxury-goods trade, i.e., increased volume, geographic range, and integration of regional economies.

**KC 3.1**

**Theme 4: Economic Systems**

**Skills:** CCOT, Contextualization, Use of Evidence

From assigned pages in the textbook, primary sources from interregional travelers, and Lynda Shaffer’s article “Southernization,” create a list of the diffusion of food crops, industrial crops, luxury goods (silk and cotton textiles, porcelain, spices, precious gems, and exotic animals), and agricultural techniques throughout the Dar al-Islam and Mediterranean basin (e.g., cotton, sugar, citrus). Then rank the list in order of economic importance to the producing region and to the consuming region.

**Instructional Activity:**

**KC 3.1**

**Theme 1: Environment**

**Skills:** Argumentation, Comparison, Contextualization, Use of Evidence

Students need practice with making historical judgments because, as teenagers, they tend to consider judgments as being pejorative rather than assessing importance. When they hear the teacher modeling how to rank and judge historical importance or significance, they begin to make their own historical judgments about how to sift evidence and determine the more likely cause or effect of particular historical developments.

**Instructional Activity:**
Create a map showing the spread of bubonic plague in the 14th century and analyze primary sources to recognize the differing responses to the plague among Muslims, Christians, and Jews in the Mediterranean region.

---

**Essential Questions:**

- What is the value in studying cultural areas vs. states?
- Did changes in this period occur more from the effects of nomadic migrations or urban growth?
- To what extent did economic networks overlap during this period?
## Period 3. Regional and Transregional Interactions, c. 600 to c. 1450 (continued)

<th>Instructional Activities and Assessments</th>
</tr>
</thead>
<tbody>
<tr>
<td>KC 3.1</td>
<td>Theme 2: Cultures, Theme 5: Social Structures</td>
<td>Bulliet, Chapters 12–14 Andrea, Chapter 12</td>
<td><strong>Instructional Activity:</strong> Analyze primary sources that demonstrate the diffusion of literary, artistic, and cultural traditions (e.g., lists of books showing the interest in Greek science and philosophy in western Europe via Muslim Spain; photographs or illustrations of mosques that show architectural diffusion; illustrations of city planning in China and Japan; examples of poetry and porcelain in East Asia and Southwest Asia; portrait paintings that show the influence of Neo-Confucianism, Hinduism, and Buddhism in East and Southeast Asia; excerpts from Ibn Battuta’s Rihla about Islamic educational institutions; and architectural styles of mosques that show the influence of Islam in sub-Saharan Africa and Southeast Asia). <strong>Summative Assessment:</strong> Write an essay on the cross-cultural exchanges fostered by networks of trade and communication that make use of primary sources on the topic. Explain how these illustrate the cultural roles of merchant diasporas, the role of entrepôt cities as cosmopolitan cultural and commercial centers, and other roles of cities as administrative and religious centers. (Some of the primary sources will be from interregional travelers commenting on cultural similarities and differences along trade networks.)</td>
</tr>
<tr>
<td>KC 3.1</td>
<td>Theme 1: Environment, Theme 4: Economic Systems</td>
<td>Bulliet, Chapters 8–10</td>
<td><strong>Instructional Activity:</strong> Using assigned pages in the textbook and lecture notes, create an annotated map to show the continued diffusion of flora, fauna, and pathogens throughout the Eastern Hemisphere, paying particular attention to the banana, new rice varieties, sorghum, sugar, and pandemics from bubonic plague. Add the other commercial cities connected to networks that overlapped those in the Indian Ocean (Constantinople, Kiev, Venice, Genoa, Hamburg, and London) as well as the development of caravans and caravanserai. (homework)</td>
</tr>
</tbody>
</table>

### Essential Questions:
- What is the value in studying cultural areas vs. states?
- Did changes in this period occur more from the effects of nomadic migrations or urban growth?
- To what extent did economic networks overlap during this period?
### Unit 3: Period 3. Regional and Transregional Interactions, c. 600 to c. 1450

*(continued)*

</tr>
</tbody>
</table>

Students love to dress up and play roles in trials, especially when they can use unique primary sources to construct or respond to questions in an exciting atmosphere in which the outcome is uncertain. I view the trials as formative assessments because I can hear whether their questions or statements are historically accurate and provide corrections or additional context as the trial proceeds.

This essay relates to the Essential Questions: What is the value in studying cultural areas vs. states? Did changes in this period occur more from the effects of nomadic migrations or urban growth? To what extent did economic networks overlap during this period? These Essential Questions all help students not only analyze the effects of the Mongols but also see those effects in a wider historical pattern of the urban and nomadic developments that affected trade.

Essential Questions: ▼ What is the value in studying cultural areas vs. states? ▼ Did changes in this period occur more from the effects of nomadic migrations or urban growth? ▼ To what extent did economic networks overlap during this period?
### Period 3. Regional and Transregional Interactions, c. 600 to c. 1450 (continued)

#### Learning Objectives

- Explain the causes and effects of increased economic productive capacity and its consequences.

#### Key Concepts, Themes, and Historical Thinking Skills

**KC 3.3. Increased Economic Productive Capacity and Its Consequences**

**Theme 1:** Environment

**Theme 4:** Economic Systems

**Skills:** Causation, CCOT, Comparison, Contextualization, Synthesis, Use of Evidence

#### Materials

Most textbooks have relevant images of these items. There is an image library at the Bridging World History website: http://www.learner.org/courses/worldhistory/archive.html

#### Instructional Activities and Assessments

**Instructional Activity:** Using visual primary sources from the postclassical period, identify the increasing productive capacity in agriculture and industry: improved plows and horse collars in Europe, expansion of irrigation networks and terracing techniques, and expanded textile and porcelain production in China, Persia, and India.

**Formative Assessment:** Analyze data about changes in urban demography to compare factors contributing to decline of urban areas (e.g., invasions, disease and hygienic conditions in towns, decline of rural productivity, climate change/Little Ice Age) with factors contributing to the growth or renewal of urban areas (e.g., safe and reliable transport, increased agricultural productivity, rising population and greater availability of labor, end of invasions).

**Summative Assessment:** Students write an essay about changes and continuities in trade systems, or about labor systems, or about state building.

---

<tbody>
<tr>
<td><strong>Instructional Activity:</strong></td>
<td>Analyze demographic data on the effects of intensification of peasant labor, increasing slave trades, coerced labor, and labor migrations.</td>
</tr>
<tr>
<td><strong>Instructional Activity:</strong></td>
<td>Compare primary source images that reveal the fluctuating political power of existing elites as a result of expanding global interactions (e.g., zamindars in Mughal empire, nobility in Europe, and daimyo in Japan).</td>
</tr>
<tr>
<td><strong>Instructional Activity:</strong></td>
<td>Analyze gender and social systems in pre-conquest Aztec and Incan empires through the Codex Mendoza and the writings and images from Incan nobility.</td>
</tr>
</tbody>
</table>

#### Instructional Activity:

Analyse primary sources in a seminar about changes and continuities in labor systems. Examples may include intensification of peasant labor, slavery in Africa and the trans-Saharan slave trade, Atlantic slave trade and growth of the plantation economy, formation of and changes in the encomienda, hacienda, and mita systems in Spanish America, indentured servitude in British and French colonies, serfdom in Russia and Europe, sugar production as a proto-industrial enterprise, and textile production in India and China. Sources also focus on gender and family relations connected to labor systems, as well as possible choices of leisure activities, including innovative forms of visual and performing arts in China, Japan, and England (woodblock prints, theater, restaurants and teahouses in China, and the diffusion of games like chess).

**Summative Assessment:**

Write an essay about changes and continuities in trade systems or about labor systems.

---

**Estimated Time:** 6 weeks

---

Students need practice analyzing quantitative data, especially on topics like demography that seem quite foreign to them. One source for demographic data is in most world history textbooks that include at least one chart on the numbers of slaves forced across the Atlantic Ocean between 1500 and 1800. Another source for data and lessons relevant to the topic of demography is the teaching unit “The Making of the Atlantic Rim.”

| Connect the process of industrialization with the growth in global capitalism. | **KC 5.1.** Industrialization and Global Capitalism  
**Theme 4:** Economic Systems  
**Skills:** Causation, CCOT, Comparison, Contextualization, Synthesis, Use of Evidence | Bulliet, Chapter 22  
Resources and articles on website: China and Europe 1500-2000 and Beyond: What is “Modern”?  
http://afe.easia.columbia.edu/chinawh/web/s1/index.html | **Instructional Activity:**  
Write a video critique about the causes and effects of new patterns of global trade and production in the early modern period, paying special attention to changes in transportation and communication technologies, new financial institutions, and the proliferation of large-scale transnational businesses.  
**Formative Assessment:**  
Analyze a timeline on the beginnings of industrialization in Great Britain through the spread of industrializations by 1900. Then rank the factors that influenced the development of steam power for industrial production and the subsequent political and economic effects of European mass production in Europe and in resource-rich regions outside of Europe.  
**Summative Assessment:**  
Discuss how the world historians Kenneth Pomeranz and Bin Wong explain the divergence of Great Britain and Qing China in the 18th and 19th centuries on the website http://afe.easia.columbia.edu/chinawh/web/s1/index.html. |

**Essential Questions:**  
▼ How did the influence of industrialization spread throughout the world?  
▼ How did the rights of individuals and groups change in this period?  
▼ To what degree did new types of social conflict emerge during the 19th century?  
▼ How and where did the idea of “The West” become a coherent and leading force in historical interpretation?

---

I frequently ask students to rank historical factors of causation and compare them across time and space. This is easy to do in my classroom because I have an interactive whiteboard on which students can move the words or images representing various factors while their classmates agree or disagree with their choices. This allows more time for students to record their own rankings and justifications after the whole class debate.

This relates directly to the Essential Questions: How did the influence of industrialization spread throughout the world? How and where did the idea of “The West” become a coherent and leading force in historical interpretation?
### Unit 5:
**Semester Two**
**Period 5. Industrialization and Global Integration, c. 1750 to c. 1900** (continued)

**Estimated Time:** 6 weeks

| Explain the causes and effects of imperialism and the increase in nation-states. | **KC 5.2.** Imperialism and Nation-State Formation  
**Theme 3:** State-Building  
**Skills:** Causation, CCOT, Comparison, Contextualization, Synthesis, Use of Evidence | Bulliet, Chapters 24–27  
Wright, *The World and a Very Small Place in Africa* | **Instructional Activity:**  
Research social transformations in industrialized societies as well as the reactions to the spread of global capitalism. Address issues of deindustrialization, unions, state-sponsored industrialization programs, utopian and Marxist socialism, and industrialized states’ domestic reforms. Case studies include Egypt, Japan, Russia, and Germany.  
**Summative Assessment:**  
Present Hyde Park-style speeches on social reform movements resulting from industrialization. |
| **KC 5.2**  
**Theme 5:** Social Structures  
**Skills:** Causation, CCOT, Comparison, Contextualization, Synthesis, Use of Evidence | | | **Instructional Activity:**  
Analyze how Donald Wright uses a case study of The Gambia to show changes over time in gender roles in the 19th century as a result of The Gambia’s integration into the global food export economy. |

**Essential Questions:**  
▼ How did the influence of industrialization spread throughout the world?  
▼ How did the rights of individuals and groups change in this period?  
▼ To what degree did new types of social conflict emerge during the 19th century?  
▼ How and where did the idea of “The West” become a coherent and leading force in historical interpretation?
###学习目标

**Key Concepts, Themes, and Historical Thinking Skills**

| 学习目标 | 关键概念、主题和历史思维技能 | 材料 | 教学活动和评估
| --- | --- | --- | ---
| KC 5.2 | 主题3: 国家建设 | Callahan, “British Convict Forced Migration to Australia: Causes and Consequences” | **教学活动**: 比较英国将“强迫工人”用于东南亚与他们将“运输”到北美和澳大利亚殖民地的“正当性”解释之间的区别。Yang, “Indian Convict Workers in Southeast Asia in the Late Eighteenth and Early Nineteenth Centuries”

| KC 5.2, 5.3 | 主题3: 国家建设 | Bulliet, 章节24-27 | **教学活动**: 比较导致民族主义运动的原因，如印度国民大会, 犹太民族主义, 太平天国和义和团运动, 印度1857年起义, 马赫迪起义, 鬼舞, 种牛运动, 沙里亚运动, 泰伊马特改革。

| Explain the causes and effects of global migrations in the 19th century. | KC 5.4. Global Migration  
Theme 3: State-Building  
Theme 4: Economic Systems  
Theme 5: Social Structures  
Skills: Causation, CCOT, Comparison, Contextualization, Synthesis, Use of Evidence | Manning, Chapter 8 | **Instructional Activity:**  
Analyze data on demography and urbanization and compare to earlier periods; explain the causes of increased global migration and the effects on increased coerced labor despite the abolition of slavery and serfdom in many places. Case studies: South Asians working on railroads in East Africa and Italians as seasonal agricultural laborers in Argentina.  
**Instructional Activity:**  
Analyze photographs of 19th-century immigrants to the Americas. Write a critique that shows the consequences of and reactions to human migrations, including the development of ethnic and racial prejudice. |
| All learning objectives for Unit 5 | KC 5.1, 5.2, 5.3, 5.4  
All themes  
Skills: all | | **Summative Assessment:**  
Unit Test: 50 multiple-choice questions that touch on all of the geographic regions, themes, relevant Key Concepts (KC 5.1, 5.2, 5.3, 5.4), and historical thinking skills. |

### Essential Questions:
- How did the influence of industrialization spread throughout the world?  
- How did the rights of individuals and groups change in this period?  
- To what degree did new types of social conflict emerge during the 19th century?  
- How and where did the idea of “The West” become a coherent and leading force in historical interpretation?

| Identify how advances in science and technology altered humans’ interactions with the environment in the 20th century. | KC 6.1. Science and the Environment  
Theme 1: Environment  
Skills: Causation, CCOT, Contextualization, Periodization, Synthesis, Use of Evidence | 2011 DBQ on the Green Revolution | **Instructional Activity:**  
Write a video critique on new scientific paradigms in physics, such as the Big Bang theory, focusing some attention on periodization issues caused by these paradigm shifts in the 20th century.  
**Instructional Activity:**  
Compare quantitative data on the demographic effects of the Green Revolution in India during the 1970s with the medical innovations that led to the elimination of the smallpox virus.  
**Summative Assessment:**  
Discuss the effects of changes in communication, transportation, medical, and military technology from 1750 to 2000 and explain local and transregional responses to those changes in the decades after World War II.  
**Instructional Activity:**  
Analyze quantitative data on climate change over time from 1800 to the present in order to identify how humans affect the environment. Identify the key points of the debate in the late 20th and early 21st centuries.  
**Instructional Activity:**  
Draw a political cartoon weighing the relative merits of botanical research with the possibly more pressing issue of altering human-created climate change. |

### Essential Questions:
- How do ideological struggles provide an explanation for many of the conflicts of the 20th century?  
- To what extent have the rights of the individual and the state been replaced by the rights of the community?  
- How have conflict and change influenced migration patterns internally and internationally?  
- How have international organizations influenced change?
## Semester Two
### Period 6. Accelerating Global Change and Realignments, c. 1900 to Present
*(continued)*

| Explain the causes and effects of military and economic global conflicts in the 20th century. | KC 6.1, 6.2. Global Conflicts and Their Consequences  
Theme 1: Environment  
Skills: Causation, Contextualization, Periodization, Synthesis, Use of Evidence | Bulliet, Chapters 28 and 29 | **Summative Assessment:**  
Write a speech for a Hyde Park Corner soapbox advocating for botanical research to improve medical treatments. Then, write heckler speeches for:  
- a conservative, anti-Darwinist who opposed further scientific “manipulation” of the environment;  
- a Brazilian landowner whose rubber plantations produced a big profit during World War I;  
- Congolese or Indonesian rubber plantation workers who were treated as 20th-century slaves. |
| | KC 6.2  
Theme 3: State-Building  
Skills: Argumentation, Causation, Synthesis, Use of Evidence | | **Formative Assessment:**  
Create an annotated timeline on military technology used in World War I and World War II: Total war (e.g., aircraft, rocket engines, submarines, computers, radar and sonar, nuclear weapons). Write a short response to the question of whether the two world wars should be considered one war. |
| | KC 6.2  
Theme 3: State-Building  
Skills: Causation, Periodization, Synthesis, Use of Evidence | | **Instructional Activity:**  
Write a video critique on consequences of weapons of mass destruction: nuclear, biological, and chemical weapons on civilians and refugees. |

**Essential Questions:**  
- How do ideological struggles provide an explanation for many of the conflicts of the 20th century?  
- To what extent have the rights of the individual and the state been replaced by the rights of the community?  
- How have conflict and change influenced migration patterns internally and internationally?  
- How have international organizations influenced change?
### Semester Two
### Period 6: Accelerating Global Change and Realignments, c. 1900 to Present (continued)

<table>

<tr>
<td>KC 6.2</td>
<td>Theme 3: State-Building</td>
<td></td>
<td><strong>Instructional Activity:</strong></td>
</tr>
<tr>
<td></td>
<td>Skills: Causation, Synthesis, Use of Evidence</td>
<td></td>
<td>Analyze photographs and data on the effects of global military and economic mobilization, including colonized people (e.g., Gurkha soldiers, Senegalese sharpshooters, production of war material).</td>
</tr>
</tbody>
</table>

**KC 6.2**
**Theme 3: State-Building**
**Skills:** Causation, Contextualization, Synthesis, Use of Evidence

- **Formative Assessment:** Create an annotated map on the political effects of the dissolution of land-based empires (e.g., Ottoman, Russia/Soviet Union, Qing).
- **Summative Assessment:** Write an essay, based in part on analysis of primary sources, comparing changes and continuities in communist states from 1917 to 1997, focusing on the Soviet Union, China, Cuba, and North Korea.

**Instructional Activity:**
Analyze point of view, purpose, and audience in sources about the formation of national identities in response to Wilson’s 14 Points and the Treaty of Versailles.

**Summative Assessment:**
Write an essay comparing the methods and effects of decolonization movements in Africa and Asia in the 20th century.

---

**Essential Questions:**

- How do ideological struggles provide an explanation for many of the conflicts of the 20th century?
- To what extent have the rights of the individual and the state been replaced by the rights of the community?
- How have conflict and change influenced migration patterns internally and internationally?
- How have international organizations influenced change?

I always begin this lesson with a reference to current events in the world that relate to the decisions made at Versailles. Students are then often more interested in the historical context for the ongoing territorial, resource, or social issues.

This directly relates to the Essential Questions: How do ideological struggles provide an explanation for many of the conflicts of the 20th century? To what extent have the rights of the individual and the state been replaced by the rights of the community? How have conflict and change influenced migration patterns internally and internationally? How have international organizations influenced change?

| All learning objectives for Unit 6 | KC 6.1, 6.2, 6.3  
All themes  
Skills: all | Summative Assessment:  
Unit Test: 50 multiple-choice questions that touch on all of the geographic regions, themes, relevant Key Concepts (KC 6.1, 6.2, 6.3), and historical thinking skills. |

Review for Exam Activities: 2 weeks
Create comparative and Continuity-and-Change-Over-Time charts; practice document analysis; practice selective-response questions; create graphic organizers and timelines; and produce film treatments about major historical events with memorable historical figures. Students work with a partner to make a 3–5 minutes presentation of an important historical event as if a film were being made about it. The presentation is like a pitch to Hollywood producers and includes:
- AP World History time period, AP World History themes, region(s), and basic facts about the event
- Plot summary: Four- to six-sentence description of the basic situation at the beginning of the film, at least two major events (complications/changes in the situation), and the climax/effects of the changes
- Two images of the setting (original illustrations or credited photographs)
- Famous actors for two major characters
- Music score for at least one scene that reflects your POV of the scene
- Bibliography of at least two reliable sources (no textbook, Wikipedia, or other websites with no reliable author)

Types of Films:
- Action Films — Triumphs, e.g., Genghis Khan Creates an Empire
- Action Films — Tragedies, e.g., Destruction of the Second Temple in Jerusalem or End of Incan Empire
- Romantic — Chick Flicks, e.g., Mauryan Emperor Asoka and Queen Devi
- Documentaries — e.g., Mali King Mansa Musa’s Hajj in 1324 C.E.

Essential Questions:
- How do ideological struggles provide an explanation for many of the conflicts of the 20th century?  
- To what extent have the rights of the individual and the state been replaced by the rights of the community?  
- How have conflict and change influenced migration patterns internally and internationally?  
- How have international organizations influenced change?
