# AP ${ }^{\circledR}$ MUSIC THEORY 2016 SCORING GUIDELINES 

## 0-9 points

Use EITHER the regular scoring guide OR an alternate scoring guide, whichever gives the higher score.
I. Regular Scoring Guide
A. Score 1 point for each segment (i.e., each half-measure) correct in pitch, rhythm, and tempo (0-8).
B. If at least one segment is correct using I.A., add 1 point for a complete response that has no hesitations or restarts (= overall flow; the "flow" point).
C. Record any score of 4 or higher and move to the next MP3 file/tape.
D. If the score is less than 4 , try an alternate scoring guide.
II. Alternate Scoring Guides (N.B.: Do NOT award the "flow" point in the alternate scoring guide.)
A. If a student sings many of the pitches correctly but is consistently inaccurate in rhythm, you may determine holistically to award up to 4 points for pitch.
OR
B. If a student is accurate or nearly accurate with respect to rhythm but is consistently inaccurate in pitches, you may determine holistically to award up to 2 points for rhythm.

## III. Scores with Additional Meaning

1 This score may be given to a response that has two or more redeeming qualities (e.g., retention of the tonic pitch and singing the melody with a correct contour; persistence alone is not a redeeming quality).
0 This score is used for a response that has no redeeming qualities (or only one) or a response that is off-topic or irrelevant.
$\mathbf{N R}$ (MP3s) NR is used for blank responses (including spoken AP number but no response).

- (Cassettes) The dash is used for blank responses (including spoken AP number but no response).

## Scoring Notes:

A. If a student restarts, score the last complete response, but do not award the "flow" point.
B. Score from the tonic established by the student. However, credit any exactly transposed segment approached by the correct interval. In other words, any segment entered correctly (by the correct interval) is eligible for the point.
C. The last note may be eligible for the point if the student returns to the original tonic, even if the preceding segments have been transposed, and the original tonic is not approached correctly.
D. If the student changes tempo and continues in the new tempo, do not credit the segment where the change occurs, but credit the ensuing segments.
E. The last note must be held at least to the attack of the final eighth note of measure four for that segment to receive credit.
F. Ignore any use (correct or incorrect) of syllables, letter names, or numbers, as well as expletives, giggles, and the like.
G. If you try both regular and alternate guides, record the higher of the scores.
H. Scores from one guide may not be combined with those of another.
I. Listen beyond the end of the performance to ensure that the student made no additional response.

# AP ${ }^{\circledR}$ MUSIC THEORY <br> 2016 SCORING COMMENTARY 

## Question S1

## Overview

This question assessed students' ability to:

- sight read and sing a melody in major mode;
- sing in simple meter;
- perform common rhythmic patterns;
- perform a dotted rhythm;
- perform conjunct motion;
- $\quad$ sing a melody with a melodic range of a minor ninth;
- perform chordal skips within the tonic and dominant triads;
- sing a two-phrase unit with motion from sol to do;
- retain a sense of tonic; and
- read in bass clef.

## Sample: S1A

## Score: 9

This represents an excellent response. The student correctly sings all pitches and rhythms without hesitation and demonstrates an understanding of simple meter. Each segment earned 1 point. With the addition of the flow point, the student received a score of 9 . Scoring by segments was: $11111111+1=9$.

## Sample: S1B <br> Score: 5

This represents a fair response. The student correctly sings segments one, five, six, and seven. In segments two, three, and four, the student sings incorrect pitches. Segment eight is correct in pitch but is not held long enough. Because the student sings without hesitation, the flow point was awarded, resulting in a score of 5 . Scoring by segments was: $10001110+1=5$.

## Sample: S1C

## Score: 3

This represents a weak response. The student correctly sings segments three and seven, but there are errors in pitch and rhythm in the remaining segments. Because the student sings without hesitation, the flow point was awarded, resulting in a score of 3 . Scoring by segment was: $00100010+1=3$.
