College-Bound Seniors

Reports 2011

The reports allow you to:

Monitor college readiness of your students

Deliver important information to key educational stakeholders

Effect curricular planning when used in conjunction with SAT® Skills Insight™

SAT[®] College-Bound Seniors Reports

The College Board remains committed to partnering with schools, districts and states to ensure that all students are prepared for college and have the opportunity to attend college. That is why the College Board has worked so closely on the Common Core State Standards Initiative. The SAT[®] shows strong alignment with these standards. Furthermore, states, districts and schools can be confident that students whose curriculum is tied to the Common Core State Standards will be acquiring the skills and knowledge necessary to succeed on the SAT. The College Board can partner with you and contribute meaningfully and substantively to your commitment in advancing college readiness.

Take advantage of this opportunity to receive detailed information about your students' college readiness, including multiyear trends. These reports provide the mean scores of college-bound seniors for your entire school, district or organization, as well as the mean scores by gender and ethnicity. They provide a wealth of clear, user-friendly information on the number of test-takers, their course work, their GPAs and other valuable information. Five-year performance data are also provided to help you analyze trends over time.

First, use these reports to understand and report on the college readiness of your students. Then use that knowledge, along with **SAT Skills Insight™**, to influence curricular planning. SAT Skills Insight is a free, online tool that categorizes the types of skills students need to develop based on their SAT scores.

Additional Reporting Services Available

Customized Data Requests

If you do not see a report that meets your needs or if you want to receive data information about your students' participation and performance in other College Board programs, you may submit a request for this information. In order to submit a request and for fee information, please visit us at www.collegeboard.org/satdata.

Please see the back cover for information on how to order.
