1. Graduation rate data as well as the 25th and 75th percentiles of enrolled students’ test scores are for the 2013-14 school year and come from the U.S. Department of Education.

2. Annual cost of attendance includes the full cost of tuition, fees, books, housing, food, and other expenses reported by colleges in the 2014-15 school year in the *Annual Survey of Colleges*. These costs are customized for you based on your home state.

3. Net price — or what you’ll likely pay — is estimated for 2014-15 using data from the U.S. Department of Education. Net price is the annual amount left after grants and scholarships, which can usually be managed by a combination of family resources, earnings from a campus job, and low interest rate loans.

– Data from other sources and different school years will be slightly different, so remember that the best source of information is each college’s website.
