SAT Suite

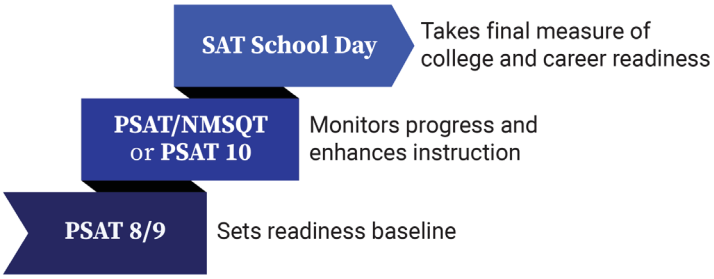

PSAT 10 in New Hampshire

What's New for New Hampshire Schools

The New Hampshire Department of Education (NHED) is pleased to announce that the PSAT™ 10 is now fully funded. Schools will continue to administer the SAT School Day (without Essay) each spring and now have the option to administer the PSAT 10 during the same window.

The Opportunity: Administer the PSAT 10, Consider the PSAT 8/9

What is the PSAT 10?

Taken in 10th grade, the PSAT 10 is a meaningful checkpoint in the SAT Suite of Assessments. It shows students and families how far students have come since the PSAT 8/9 baseline and where to focus heading into junior year, when the PSAT/NMSQT® and SAT follow. Students get a personalized score breakdown, college and career planning insights, and free practice resources to keep building skills and confidence.

Testing time: 2 hours, 14 minutes. Score scale: 320–1520.

What is the PSAT 8/9?

Taken in 8th or 9th grade, the PSAT 8/9 marks a student's first step in the SAT Suite. It measures the same reading, writing and math skills students learn in school, showing them their strengths and areas for growth. Students prepare best by focusing on the skills they're already learning in class and getting familiar with the test format.

Testing time: 2 hours, 14 minutes. Score scale: 240–1440.

Vertically Aligned Data that Tracks Growth

A score to build on. Because PSAT 8/9 and PSAT 10 scores are aligned to the SAT scale, they serve as a reliable anchor for tracking students' growth throughout high school.

Time to act. Results come as early as 8th grade, so families have more runway to respond to what they learn—well before decisions about course selection or college and career start to feel urgent.

Practice makes progress. Neither the PSAT 8/9 nor the PSAT 10 counts toward college admissions, so students can focus on learning where they stand, with plenty of time left to practice and improve.

How does the system work together?

The SAT Suite of Assessments is a connected system built on a common scoring scale. Each assessment is aligned to measure the skills that matter most for college and career readiness, giving educators a way to track growth over time, not just see a single snapshot.

- While the PSAT 8/9 isn't currently state-funded, College Board encourages districts and schools to consider administering it. The PSAT 8/9 is offered in both the fall and spring testing windows, giving schools flexibility to fit it into their calendar and budget.
- PSAT 8/9 in 8th or 9th grade gives students an early start, with PSAT 10 following in 10th grade.
- Layering the PSAT 8/9 and PSAT 10 builds a longitudinal data set for each student, from an early readiness snapshot in middle school straight through to college and career planning.

Discover AP Potential

AP Potential™ is a free, online tool that uses SAT Suite data to identify students likely to score 3 or higher on a given AP Exam. It helps schools expand access to Advanced Placement®, grow AP® course offerings, strengthen college readiness, and close opportunity gaps. Through the K–12 score reporting portal, educators can access AP Potential to view and download student rosters.

Support Planning with BigFuture School

BigFuture® School is a free mobile app designed for students taking an in-school SAT Suite assessment. Students 13 years of age and older can access their score report through the BigFuture School mobile app if they provide their mobile number in Bluebook™, College Board's digital testing platform. As soon as scores are released, students can access their results in BigFuture School, along with personalized college and career guidance on their phone.

Next Steps:

1. Schools are required to complete the annual onboarding survey in the SAT Suite Ordering and Registration (SSOR) system between October 1–23.
2. All students will automatically be uploaded into the State Data Management System (SDMS) by the NHED.
3. Complete the **PSAT 10 Participation Survey** by December 4, 2026, indicating whether or not your school will administer the PSAT 10 for spring 2027.
